

Contents

Introduction to “Schubert varieties, equivariant cohomology and characteristic classes, IMPANGA15 volume” <i>by Jarosław Buczyński, Mateusz Michałek and Elisa Postingshel</i>	1
Friedrich Hirzebruch – a handful of reminiscences <i>by Piotr Pragacz</i>	9
Pieri rule for the factorial Schur P -functions <i>by Soojin Cho and Takeshi Ikeda</i>	25
Restriction varieties and the rigidity problem <i>by Izzet Coskun</i>	49
On Plücker equations characterizing Grassmann cones <i>by Letterio Gatto and Parham Salehyan</i>	97
Kempf–Laksov Schubert classes for even infinitesimal cohomology theories <i>by Thomas Hudson and Tomoo Matsumura</i>	127
On the multicanonical systems of quasi-elliptic surfaces in characteristic 3 <i>by Toshiyuki Katsura</i>	153
Characteristic classes of mixed Hodge modules and applications <i>by Laurențiu Maxim and Jörg Schürmann</i>	159
On a certain family of $U(\mathfrak{b})$ -modules <i>by Piotr Pragacz</i>	203
Equivariant Chern–Schwartz–MacPherson classes in partial flag varieties: interpolation and formulae <i>by Richárd Rimányi and Alexander Varchenko</i>	225
Thom polynomials in \mathcal{A} -classification I: counting singular projections of a surface <i>by Takahisa Sasajima and Toru Ohmoto</i>	237
Schubert polynomials and degeneracy locus formulas <i>by Harry Tamvakis</i>	261

Hirzebruch χ_y -genera of complex algebraic fiber bundles – the multiplicativity of the signature modulo 4 <i>by Shoji Yokura</i>	315
Pushing-forward Schur classes using iterated residues at infinity <i>by Magdalena Zielenkiewicz</i>	331
