Erratum:
Fitting a $C^m$-smooth function to data II

Charles Fefferman and Bo’az Klartag

A few small changes have to be made to the proof of Lemma 3 in Section 30, pages 139–140. The definition of $P_t'$ in (52) in page 139 should include a factor of $\lambda^{-\|\gamma_t\|}$. That is, the correct definition should be

\begin{equation}
P_t' = \frac{(\alpha'_t)!}{(\alpha'_t + \gamma_t)!} \lambda^{-\|\gamma_t\|} x^\gamma_t \odot_0 P_{\alpha'_t}.
\end{equation}

Furthermore, we need to replace $\lambda^{\|\beta\|}$ by $\lambda^{\|\beta+\gamma_t\|}$ in (54), we need to replace $\lambda^{\|\alpha'_s\|}$ by $\lambda^{\|\alpha'_s+\gamma_s\|}$ in the definition of the matrix $A$ and also in (57), and we need to replace $\lambda^{\|\alpha'_t\|}$ by $\lambda^{\|\alpha'_t+\gamma_t\|}$ in (58) and (59). The rest of the proof stays intact.
