Preface	v
Panoramic Overview	1
Part 1. The Base Theory of Pro-Lie Groups	6
Part 2. The Algebra of Pro-Lie Algebras	19
Part 3. The Fine Lie Theory of Pro-Lie Groups	28
Part 4. Global Structure Theory of Connected Pro-Lie Groups	35
Part 5. The Role of Compactness on the Pro-Lie Algebra Level	44
Part 6. The Role of Compact Subgroups of Pro-Lie Groups	52
Part 7. Local Splitting According to Iwasawa	61
1 Limits of Topological Groups	63
Limits	63
The External Approach to Projective Limits	77
Projective Limits and Local Compactness	82
The Fundamental Theorem on Projective Limits	88
The Internal Approach to Projective Limits	90
Projective Limits and Completeness	93
The Closed Subgroup Theorem	96
The Role of Local Compactness	100
The Role of Closed Full Subcategories in Complete Categories	102
Postscript	104
2 Lie Groups and the Lie Theory of Topological Groups	107
The General Definition of a Lie Group	107
The Exponential Function of Topological Groups	110
The Lie Algebra of a Topological Group	114
The Category of Topological Groups with Lie Algebras	119
The Lie Algebra Functor Has a Left Adjoint Functor	126
Sophus Lie's Third Fundamental Theorem	130
The Adjoint Representation of a Topological Group with a Lie Algebra	131
Postscript	133
3 Pro-Lie Groups	135
Projective Limits of Lie Groups	135
The Lie Algebras of Projective Limits of Lie Groups	137
Pro-Lie Algebras	138
Weakly Complete Topological Vector Spaces and Lie Algebras	142
Pro-Lie Groups	148

Some Examples	160
An Overview of the Definitions of a Pro-Lie Group	160
Postscript	164
4 Quotients of Pro-Lie Groups	168
Quotient Objects in Categories	169
Quotient Groups of Pro-Lie Groups	170
The Exponential Function of Compact Abelian Groups and Quotient Mor- phisms	173
The One Parameter Subgroup Lifting Theorem	182
Sufficient Conditions for Quotients to be Complete	194
Quotients and Quotient Maps between Pro-Lie Groups	208
Postscript	210
5 Abelian Pro-Lie Groups	212
Examples of Abelian Pro-Lie Groups	212
Weil’s Lemma	215
Vector Group Splitting Theorems	219
Compactly Generated Abelian Pro-Lie Groups	233
Weakly Complete Topological Vector Spaces Revisited	235
The Duality Theory of Abelian Pro-Lie Groups	237
The Toral Homomorphic Images of an Abelian Pro-Lie Group	241
Postscript	246
6 Lie’s Third Fundamental Theorem	249
Lie’s Third Fundamental Theorem for Pro-Lie Groups	249
Semidirect Products	264
Postscript	266
7 Profinite-Dimensional Modules and Lie Algebras	269
Modules over a Lie Algebra	269
Duality of Modules	272
Semisimple and Reductive Modules	277
Reductive Pro-Lie Algebras	281
Transfinitely Solvable Lie Algebras	284
The Radical and Levi–Mal’cev: Existence	291
Transfinitely Nilpotent Lie Algebras	296
The Nilpotent Radicals	300
Special Endomorphisms of Pro-Lie Algebras	305
Levi–Mal’cev: Uniqueness	309
Direct and Semidirect Sums Revisited	313
Cartan Subalgebras of Pro-Lie Algebras	315
Theorem of Ado	330
Postscript	332

8	The Structure of Simply Connected Pro-Lie Groups	335
	The Adjoint Action	335
	Simply Connected Pronilpotent Pro-Lie Groups	336
	The Topological Splitting Technique	339
	Simple Connectivity	342
	Universal Morphism versus Universal Covering Morphism	352
	Postscript	354
9	Analytic Subgroups and the Lie Theory of Pro-Lie Groups	356
	The Exponential Function on the Inner Derivation Algebra	356
	Analytic Subgroups	360
	Automorphisms and Invariant Analytic Subgroups	369
	Centralizers	370
	Normalizers	372
	Subalgebras and Subgroups	374
	The Center	376
	The Commutator Subgroup	376
	Finite-Dimensional Connected Pro-Lie Groups	385
	Compact Central Subgroups	402
	Divisibility of Groups and Connected Pro-Lie Groups	404
	The Open Mapping Theorem	409
	Completing Proto-Lie Groups	413
	Unitary Representations	415
	Postscript	416
10	The Global Structure of Connected Pro-Lie Groups	419
	Solvability of Pro-Lie Groups	420
	The Radical	430
	Semisimple and Reductive Groups	434
	Nilpotency of Pro-Lie Groups	443
	The Nilradical and the Coreductive Radical	447
	The Structure of Reductive Pro-Lie Groups	451
	Postscript	458
11	Splitting Theorems for Pro-Lie Groups	461
	Splitting Reductive Groups Semidirectly	461
	Vector Group Splitting in Noncommutative Groups	473
	The Structure of Pronilpotent and Prosolvable Groups	478
	Conjugacy Theorems	487
	Postscript	490

12 Compact Subgroups of Pro-Lie Groups	493
Procompact Modules and Lie Algebras	493
Procompact Lie Algebras and Compactly Embedded Lie Subalgebras of Pro-Lie Algebras	500
Maximal Compactly Embedded Subalgebras of Pro-Lie Algebras	504
Conjugacy of Maximal Compactly Embedded Subalgebras	507
Compact Connected Groups	516
Compact Subgroups	519
Potentially Compact Pro-Lie Groups	521
The Conjugacy of Maximal Compact Connected Subgroups	524
The Analytic Subgroups Having a Full Lie Algebra	532
Maximal Compact Subgroups of Connected Pro-Lie Groups	544
An Alternative Open Mapping Theorem	556
On the Center of a Connected Pro-Lie Group	558
Postscript	561
13 Iwasawa's Local Splitting Theorem	566
Locally Splitting Lie Group Quotients of Pro-Lie Groups	566
The Lie Algebra Theory of the Local Splitting	571
Splitting on the Group Level	578
Some Comments on Connectedness	584
Postscript	584
14 Catalog of Examples	587
Classification of the Examples in the Catalog	587
Abelian Pro-Lie Groups	587
A Simple Construction	595
Pronilpotent Pro-Lie Groups	598
Prosolvable Pro-Lie Groups	602
Semisimple and Reductive Pro-Lie Groups	608
Mixed Groups	615
Examples Concerning the Definition of Lie and Pro-Lie Groups	616
Analytic Subgroups of Pro-Lie Groups	620
Examples Concerning Simple Connectivity	622
Example Concerning \mathfrak{g} -Module Theory	622
Postscript	623
1 Appendix 1 The Campbell–Hausdorff Formalism	624
2 Appendix 2 Weakly Complete Topological Vector Spaces	629
3 Appendix 3 Various Pieces of Information on Semisimple Lie Algebras	651
Postscript	655

Bibliography	657
List of Symbols	667
Index	669
