

Contents

Preface	vii
Introduction	xiii
Part A. Special geometry and supersymmetry	
Chapter 1. Quaternion-Kähler spaces, hyper-Kähler cones, and the c-map <i>by Martin Roček, Cumrun Vafa, and Stefan Vandoren</i>	3
Chapter 2. Differential forms on quaternionic Kähler manifolds <i>by Gregor Weingart</i>	15
Chapter 3. Sasakian geometry, holonomy, and supersymmetry <i>by Charles P. Boyer and Krzysztof Galicki</i>	39
Chapter 4. Special geometry for arbitrary signatures <i>by María A. Lledó, Óscar Maciá, Antoine Van Proeyen, and Veeravalli S. Varadarajan</i>	85
Chapter 5. Special geometry, black holes and Euclidean supersymmetry <i>by Thomas Mohaupt</i>	149
Part B. Generalized geometry	
Chapter 6. Generalized geometry – an introduction <i>by Nigel Hitchin</i>	185
Chapter 7. Generalizing geometry – algebroids and sigma models <i>Alexei Kotov und Thomas Strobl</i>	209
Chapter 8. A potential for generalized Kähler geometry <i>by Ulf Lindström, Martin Roček, Rikard von Unge, and Maxim Zabzine</i>	263
Part C. Geometries with torsion	
Chapter 9. Non-integrable geometries, torsion, and holonomy <i>by Ilka Agricola</i>	277

Chapter 10. Connections with totally skew-symmetric torsion and nearly-Kähler geometry <i>by Paul-Andi Nagy</i>	347
Chapter 11. Homogeneous nearly Kähler manifolds <i>by Jean-Baptiste Butruille</i>	399
Chapter 12. Nearly pseudo-Kähler and nearly para-Kähler six-manifolds <i>by Lars Schäfer and Fabian Schulte-Hengesbach</i>	425
Chapter 13. Quaternionic geometries from superconformal symmetry <i>by Andrew Swann</i>	455
Part D. Para-geometries	
Chapter 14. Twistor and reflector spaces of almost para-quaternionic manifolds <i>by Stefan Ivanov, Ivan Minchev, and Simeon Zamkovoy</i>	477
Chapter 15. Para-pluriharmonic maps and twistor spaces <i>by Matthias Krahe</i>	497
Chapter 16. Maximally homogeneous para-CR manifolds of semisimple type <i>by Dmitri V. Alekseevsky, Costantino Medori, and Adriano Tomassini</i>	559
Part E. Holonomy theory	
Chapter 17. Recent developments in pseudo-Riemannian holonomy theory <i>by Anton Galaev and Thomas Leistner</i>	581
Chapter 18. Geometric applications of irreducible representations of Lie groups <i>by Antonio J. Di Scala, Thomas Leistner, and Thomas Neukirchner</i>	629
Chapter 19. Surface holonomy <i>by Konrad Waldorf</i>	653

Part F. Symmetric spaces and spaces of constant curvature

Chapter 20. Classification results for pseudo-Riemannian symmetric spaces <i>by Ines Kath</i>	685
Chapter 21. Pseudo-Kähler and para-Kähler symmetric spaces <i>by Dmitri V. Alekseevsky</i>	703
Chapter 22. Prehomogeneous affine representations and flat pseudo-Riemannian manifolds <i>by Oliver Baues</i>	731

Part G. Conformal geometry

Chapter 23. The conformal analog of Calabi–Yau manifolds <i>by Helga Baum</i>	821
Chapter 24. Nondegenerate conformal structures, CR structures and quaternionic CR structures on manifolds <i>by Yoshinobu Kamishima</i>	863

Part H. Other topics of recent interest

Chapter 25. Linear wave equations on Lorentzian manifolds <i>by Christian Bär</i>	897
Chapter 25. Survey of D-branes and K-theory <i>by Daniel S. Freed</i>	915
List of Contributors	927
Index	931
