

Contents

1	Introduction and overview	1
1.1	The main result and its history	1
1.2	Wave maps to \mathbb{H}^2	4
1.3	The small data theory	8
1.4	The Bahouri–Gérard concentration compactness method	11
1.5	The Kenig–Merle argument	16
1.6	An overview of the book	18
2	The spaces $S[k]$ and $N[k]$	25
2.1	Preliminaries	25
2.2	The null-frame spaces	28
2.3	The energy estimate	42
2.4	A stronger $S[k]$ -norm, and time localizations	57
2.5	Solving the inhomogeneous wave equation in the Coulomb gauge	63
3	Hodge decomposition and null-structures	65
4	Bilinear estimates involving S and N spaces	73
4.1	Basic L^2 -bounds	73
4.2	An algebra estimate for $S[k]$	90
4.3	Bilinear estimates involving both $S[k_1]$ and $N[k_2]$ waves	93
4.4	Null-form bounds in the high-high case	101
4.5	Null-form bounds in the low-high and high-low cases	111
5	Trilinear estimates	115
5.1	Reduction to the hyperbolic case	116
5.2	Trilinear estimates for hyperbolic S -waves	148
5.3	Improved trilinear estimates with angular alignment	180
6	Quintilinear and higher nonlinearities	197
6.1	Error terms of order higher than five	217
7	Some basic perturbative results	223
7.1	A blow-up criterion	223
7.2	Control of wave maps via a fixed L^2 -profile	244
8	BMO, A_p , and weighted commutator estimates	277

9	The Bahouri–Gérard concentration compactness method	293
9.1	The precise setup for the Bahouri–Gérard method	293
9.2	Step 1: Frequency decomposition of initial data	294
9.3	Step 2: Frequency localized approximations to the data	302
9.4	Step 3: Evolving the lowest-frequency nonatomic part	309
9.5	Completion of some proofs	358
9.6	Step 4: Adding the first large component	358
9.7	Step 5: Invoking the induction hypothesis	397
9.8	Completion of proofs	421
9.9	Step 6 of the Bahouri–Gérard process; adding all atoms	422
10	The proof of the main theorem	427
10.1	Some preliminary properties of the limiting profiles	429
10.2	Rigidity I: Harmonic maps and reduction to the self-similar case	444
10.3	Rigidity II: The self-similar case	450
11	Appendix	459
11.1	Completing a proof	459
11.2	Completion of proofs	462
11.3	Completion of a proof	463
11.4	Completion of a proof	467
11.5	Completion of proofs	469
