Preface	v
1 Generalized manifolds: Introduction	1
1.1 Resolutions of generalized manifolds	6
1.2 General position properties	14
2 Surgery theory and applications to resolutions of generalized manifolds	19
2.1 Review of surgery theory on compact manifolds	19
2.2 Surgery spectra, assembly maps, and Poincaré duality	35
2.3 Boundedly controlled surgery theory	46
2.4 Germ methods in bounded surgery theory. Applications to ANR homology manifolds	60
2.5 Invariance of the index. Generalized manifolds with boundary. Gluings	73
3 Controlled surgery theory and constructions of generalized manifolds	79
3.1 The general construction	80
3.2 Review of Quinn’s results	82
3.3 Technical preliminaries	89
3.4 Construction of $4k$ -dimensional generalized manifolds	91
3.5 The ε - δ -surgery sequence	100
3.6 Construction of generalized manifolds using the ε - δ -surgery sequence and the theorems of Bryant–Ferry–Mio–Weinberger	107
4 Generalized manifolds and surgery theory	117
4.1 The homology manifold surgery sequence	117
4.2 Development of homology manifold surgery theory: Normal invariants	121
4.3 Final remarks	125
Bibliography	127
Index	145
