Preface	v
Fritz Gesztesy, Harald Hanche-Olsen, Espen R. Jacobsen, Yurii Lyubarskii, Nils Henrik Risebro, and Kristian Seip	
By such fate of signs	1
Poul G. Hjorth	
Optimal control of forward-backward stochastic Volterra equations	3
Nacira Agram, Bernt Øksendal, and Samia Yakhlef	
A unified approach to infinite dimensional integrals of probabilistic and oscillatory type with applications to Feynman path integrals	37
Sergio Albeverio and Sonia Mazzucchi	
The numbers lead a dance	55
Alan R. Champneys, Poul G. Hjorth, and Harry Man	
Compensated compactness in Banach spaces and weak rigidity of isometric immersions of manifolds	73
Gui-Qiang G. Chen and Siran Li	
The initial-boundary-value problem for an Ostrovsky–Hunter type equation	97
Giuseppe Maria Coclite, Lorenzo di Ruvo, and Kenneth Hvistendahl Karlsen	
Modeling crowd dynamics through hyperbolic – elliptic equations	111
Rinaldo M. Colombo, Maria Gokiel, and Massimiliano D. Rosini	
On the well-posedness of solutions with finite energy for nonlocal equations of porous medium type	129
Félix del Teso, Jørgen Endal, and Espen R. Jakobsen	
On the spectrum of leaky surfaces with a potential bias	169
Pavel Exner	

On the decay of almost periodic solutions of anisotropic degenerate parabolic-hyperbolic equations	183
Hermano Frid	
Factorizations and Hardy–Rellich-type inequalities	207
Fritz Gesztesy and Lance Littlejohn	
Symmetries and multipeakon solutions for the modified two-component Camassa–Holm system	227
Katrin Grunert and Xavier Raynaud	
Vanishing viscosity solutions of Riemann problems for models of polymer flooding	261
Graziano Guerra and Wen Shen	
Efficient computation of all speed flows using an entropy stable shock-capturing space-time discontinuous Galerkin method	287
Andreas Hildebrand and Siddhartha Mishra	
Dispersion estimates for spherical Schrödinger equations with critical angular momentum	319
Markus Holzleitner, Aleksey Kostenko, and Gerald Teschl	
Sixty years of moments for random matrices	349
Werner Kirsch and Thomas Kriecherbauer	
Bound states of Schrödinger type operators with Heisenberg sub-Laplacian	381
Ari Laptev and Andrei Velicu	
On Holden’s seven guidelines for scientific computing and development of open-source community software	389
Knut-Andreas Lie	
Sharp uniqueness results for discrete evolutions	423
Yurii Lyubarskii and Eugenia Malinnikova	
Spatial analyticity of solutions to nonlinear dispersive PDE	437
Sigmund Selberg	
Publications by Helge Holden	455
List of Contributors	481
