

Contents

I	Coxeter groups	1
1	Examples and motivation	3
1.1	Geometric reflection groups	3
1.2	Definition of a Coxeter group	15
1.3	Right-angled Coxeter groups	17
1.4	Weyl groups	18
2	Some combinatorial theory of Coxeter groups	21
2.1	Word metrics and Cayley graphs	21
2.2	Cayley graphs of Coxeter systems	23
2.3	Reflection systems	25
2.4	Coxeter and reflection systems; deletion and exchange conditions	27
3	The Tits representation	35
3.1	Construction of the Tits representation	35
3.2	Geometry when $m_{ij} = \infty$	38
3.3	Faithfulness of the Tits representation	40
3.4	Discreteness and linearity	42
3.5	Geometric realisations of finite and affine Coxeter groups	43
3.6	Special subgroups	45
3.7	Motivation for other geometric realisations	46
4	The basic construction of a geometric realisation	47
4.1	Simplicial complexes	47
4.2	The basic construction	48
4.3	Properties of the basic construction	52
4.4	Action of W on the basic construction	54
4.5	Universal property of the basic construction	56
4.6	The basic construction and geometric reflection groups	57
5	The Davis complex	61
5.1	Spherical special subgroups and the nerve	61
5.2	The Davis complex as a basic construction	64
5.3	Contractibility of the Davis complex	70
5.4	The Davis complex as the geometric realisation of a poset	72
5.5	The Davis complex as a CW complex	74

5.6	The Davis complex is $CAT(0)$	77
5.7	When is the Davis complex $CAT(-1)$?	83
5.8	Cohomology of Coxeter groups and applications	86
II	Buildings	91
6	Buildings as unions of apartments	93
6.1	Buildings as unions of apartments	93
6.2	First examples of buildings	95
6.3	Extended example: The building for $GL_3(q)$	99
7	Buildings as chamber systems	105
7.1	Chamber systems and related notions	105
7.2	Buildings as chamber systems	107
7.3	Equivalence of definitions	108
7.4	Comparing the definitions	111
7.5	Right-angled buildings	112
8	Retractions	115
8.1	Definition of retractions	115
8.2	Examples of retractions	116
8.3	Applications of retractions	117
9	BN-pairs	121
9.1	BN-pairs and the Bruhat decomposition	121
9.2	Strongly transitive actions	123
9.3	The building associated to a BN-pair	124
9.4	Parabolic subgroups	126
9.5	Spherical, affine and Kac–Moody BN-pairs	127
10	Exotic buildings	137
10.1	Links in buildings	137
10.2	Constructions of exotic buildings	138
