Preface	v
Introduction	1
1 Foundational material	11
1.1 Riemannian metric and curvature tensors	11
1.2 Variation formulas	14
1.3 Einstein–Hilbert functional and Ricci flow	17
1.4 Evolution equations under Ricci flow	19
1.5 Adjoint heat equation and gradient solitons	22
2 Differential Harnack inequalities	28
2.1 The Li–Yau Harnack inequality	30
2.2 Hamilton’s matrix Harnack inequality	34
2.3 Harnack inequalities for the Ricci flow	42
3 Entropy formulas	47
3.1 The static case, part I	47
3.2 Entropy for steady Ricci solitons	49
3.3 The static case, part II	53
3.4 Entropy for shrinking solitons	59
3.5 Entropy for Ricci expanders	65
4 Reduced distance and reduced volume	67
4.1 The static case	68
4.2 Perelman’s \mathcal{L} -length and \mathcal{L} -geodesics	73
4.3 Monotonicity of the reduced volume	77
Bibliography	87
List of symbols	89
Index	91
