

Contents

Introduction	vii
Characters in order of appearance	xii
I From Cardano to Newton: 1545 to 1707	1
1 From Cardano to Viète	3
2 From Viète to Descartes	29
3 From Descartes to Newton	50
II From Newton to Lagrange: 1707 to 1771	79
4 Discerning the nature of the roots	81
5 Roots as sums of radicals	104
6 Functions of the roots	121
7 Elimination theory	131
8 The degree of a resolvent	146
9 Numerical solution	153
10 The insights of Lagrange	163
11 The outsiders	184
III After Lagrange	197
12 Dissemination and new directions	199
Bibliography	209
Index	221
