Preface	vii
List of facsimiles	xi
<b>I Introduction</b>	<b>1</b>
I.1 Évariste Galois 1811–1832, revolutionary mathematician . . . . .	1
I.2 What Galois might have read . . . . .	4
I.3 The manuscripts . . . . .	6
I.4 Publication history of Galois’ mathematical writings . . . . .	8
I.5 The reception of Galois’ ideas . . . . .	10
I.6 Scope of this edition . . . . .	11
I.7 Editorial ambition and policy . . . . .	12
I.7.1 Auguste Chevalier . . . . .	13
I.7.2 Joseph Liouville . . . . .	13
I.7.3 Jules Tannery . . . . .	14
I.7.4 Robert Bourgne & Jean-Pierre Azra . . . . .	15
I.7.5 The present work . . . . .	16
I.8 Translation and interpretation . . . . .	17
I.8.1 The words <i>analyste</i> , <i>géomètre</i> . . . . .	18
I.8.2 The phrases <i>équation algébrique</i> , <i>équation numérique</i> . . . . .	19
I.8.3 The words <i>permutation</i> , <i>substitution</i> . . . . .	20
I.8.4 The word <i>groupe</i> . . . . .	22
I.8.5 The word <i>semblable</i> . . . . .	23
I.8.6 The word <i>primitif</i> . . . . .	24
I.8.7 Other words and phrases . . . . .	25
I.8.8 Glossary . . . . .	25
I.9 A ‘warts and all’ transcription . . . . .	27
I.10 The transcription: editorial conventions . . . . .	31
<b>II The published articles</b>	<b>33</b>
II.1 A theorem on continued fractions . . . . .	35
II.2 Abstract of an article on solution of equations . . . . .	49
II.3 A note on the numerical solution of equations . . . . .	55
II.4 On the theory of numbers . . . . .	61
II.5 On some points of analysis . . . . .	77
<b>III The Testamentary Letter of 29 May 1832</b>	<b>83</b>
III.1 The letter . . . . .	83
III.2 Notes on the letter . . . . .	101

<b>IV The First Memoir</b>	105
IV.1 Text of the First Memoir . . . . .	105
IV.2 Notes on the First Memoir . . . . .	145
IV.3 Letter of 31 March 1831 to the Academy . . . . .	165
<b>V The Second Memoir</b>	169
V.1 Text of the Second Memoir . . . . .	169
V.2 Notes on the Second Memoir . . . . .	195
<b>VI The minor mathematical manuscripts</b>	199
VI.1 Dossier 6: An 1830 version of Proposition I . . . . .	201
VI.2 Dossier 7: An 1830 draft of Proposition V . . . . .	209
VI.3 Dossier 8: A torn fragment . . . . .	219
VI.4 Dossier 9: Preliminary discussion . . . . .	225
VI.5 Dossier 10: Publication project and note on Abel . . . . .	233
VI.6 Dossier 11: Preface for two memoirs . . . . .	245
VI.7 Dossier 12: On the progress of pure analysis . . . . .	259
VI.8 Dossier 13: Here, as in all the sciences . . . . .	269
VI.9 Dossier 14: Science, Hierarchy, Schools . . . . .	275
VI.10 Dossier 15: Fragments on permutations and equations . . . . .	279
VI.11 Dossier 16: Fragments relating to Proposition I . . . . .	301
VI.12 Dossier 17: Fragments on the theory of equations . . . . .	311
VI.13 Dossier 18: Note on non-primitive equations . . . . .	323
VI.14 Dossier 19: Addition to the memoir on equations . . . . .	329
VI.15 Dossier 20: On the division of elliptic functions . . . . .	335
VI.16 Dossier 21: On the integration of linear equations . . . . .	347
VI.17 Dossier 22: On surfaces of the second degree . . . . .	355
VI.18 Dossier 23: On eulerian integrals . . . . .	367
VI.19 Dossier 24: A theorem of Abel . . . . .	373
<b>VII Epilogue: myths and mysteries</b>	383
VII.1 Myths . . . . .	383
VII.2 Mysteries . . . . .	385
VII.3 Last words . . . . .	390
Bibliography	391
Index	405
