Contents

Preface vii

Nef divisors on $\overline{M}_{0,n}$ from GIT
Valery Alexeev and David Swinarski 1

Inoue type manifolds and Inoue surfaces: a connected component of the moduli space of surfaces with $K^2 = 7$, $p_g = 0$
Ingrid Bauer and Fabrizio Catanese 23

Non-rationality of the symmetric sextic Fano threefold
Arnaud Beauville 57

Brill–Noether loci of stable rank–two vector bundles on a general curve
Ciro Ciliberto and Flaminio Flamini 61

Mordell-Weil groups and Zariski triples
José Ignacio Cogolludo-Agustín and Remke Kloosterman 75

Approximate computations with modular curves
Jean-Marc Couveignes and Bas Edixhoven 91

A remark on a conjecture of Paranjape and Ramanan
Friedrich Eusen and Frank-Olaf Schreyer 113

On extensions of the Torelli map
Angela Gibney 125

The classes of singular moduli in the generalized Jacobian
Benedict H. Gross 137

The Eisenstein motive for the cohomology of $\mathrm{GSp}_2(\mathbb{Z})$
Günter Harder 143

Cohomology of the moduli stack of coherent sheaves on a curve
Jochen Heinloth 165

New methods for bounding the number of points on curves over finite fields
Everett W. Howe and Kristin E. Lauter 173

Wildly ramified actions and surfaces of general type arising from Artin-Schreier curves
Hiroyuki Ito and Stefan Schröer 213

A note on a supersingular K3 surface in characteristic 2
Toshiyuki Katsura and Shigeyuki Kondō 243

The intuitive definition of Du Bois singularities
Sándor J Kovács 257

Bundles of rank 2 with small Clifford index on algebraic curves
H. Lange and P. E. Newstead 267

Descendents on local curves: Stationary theory
R. Pandharipande and A. Pixton 283

A remark on Getzler's semi-classical approximation
Dan Petersen 309

On the modular curve $X_0(23)$
René Schoof 317

Degree 4 unramified cohomology with finite coefficients and torsion codimension 3 cycles
Claire Voisin 347

Poincaré duality and unimodularity
Yuri G. Zarhin 369
